GREASE – DANDRUFF REBALANCING LOTION

Definition:

The **Grease-Dandruff Rebalancing Lotion** is formulated to revitalise the hair. It helps to regulate seborrhoeic flow and tonify the cellular renewal of the scalp, removing dead cells.

It combats the hypersecretion of sebum, produces the fast disappearance of dandruff on the overall scalp surface, eliminating all traces of plaque. It strengthens the structure and has a protective effect on the follicles, being effective for grease and dandruff problems.

Benefits of use and visible results:

- Helps nourish and moisturise thanks to the main ingredients in its formula.
- Helps regulate grease secretion.
- Helps strengthen hair structure.
- Helps eliminate dandruff.

Active ingredients and componentes:

SILK PROTEIN :

Helps to keep hair renewed, thanks to its hygroscopic properties (ability to retain water), keeping it silky, hydrated and nourished.

AMINO ACID COMPLEX :

Nourishes and strengthens the hair.

FUNGICIDAL AND ASTRINGENT AGENT :

Help regulate excess sebum (grease) and dead cells on the scalp (dandruff).

Method of application:

After washing the hair, remove excess water with a towel. Spray the necessary amount of Hipertin Rebalancing Lotion on the scalp and distribute it with a light massage.

Leave to dry without rinsing.
