

Description:

PLATINUM Deco Plex Care is a highly effective bleaching powder. A compromise between maximum whitening, up to 9 tones, and extreme hair care.

Its innovative formula with **PLEX Technology**, an active ingredient of plant origin, contains a high concentration of polycondensed sugars and conditioning agents that protect the hair during the entire bleaching process thanks to their anti-breakage action. It is a non-volatile formula that avoids overloading your working environment.

It can be used in any type of bleaching, although thanks to its characteristics it is especially suitable for intense bleaching processes.

Benefits of use and visible results:

- Helps increase hair strength
- Contributes to increased elasticity in the hair
- Helps increase hair endurance
- Helps reduce damage to the hair fiber
- Helps to effectively prevent breakage in the structures of any type of hair.

Active principles and components:

PERSULFATE:

It releases active oxygen in its decomposition process, which helps increase the bleaching effect of peroxide (hydrogen peroxide).

PLEX TECHNOLOGY CONDITIONING AGENTS:

They help protect the hair and rebuild the bonds of the hair structure.

Application mode:

Deposit the needed dose in a non-metallic container. Mix with hydrogen peroxide and stir well until you obtain a homogeneous and shiny cream. Mixing ratio 1:2: use twice as much Oxygenated as Bleaching Powder. The exposure time and the volumes of hydrogen peroxide will be according to professional criteria, the condition of the hair and the tones to be lightened. It is recommended to mix with hydrogen peroxide of no more than 40vol. Do not exceed the exposure time more than 35 minutes.

The recommendations described on the product packaging should always followed.

Presentation and formats:

- 1 Bottle of DECO PLEX CARE 500g. (500g. bag + spoon) → **code 1528**
 - Box with 6 cans.
