HI

TWO BIPHASE
CONDITIONER

Definition:

Instant hair conditioner. Nourishes, moisturises and restructures hair. Non greasy. No rinsing required. Suitable for daily use.

2 phases:

1. The upper layer, white, formulated with silicone. Provides shine, flexibility and volume.
2. The blue lower layer is an aqueous mixture rich in conditioning ingredients.

Benefits of use and visible results:

- Helps to provide components necessary for the restructuring of the hair.
- Helps to improve the appearance of the hair.
- Helps to protect the hair from external damage.
- Contributes to the improvement of combability.
- Helps to increase the shine and softness of the hair.

Active ingredients and componentes:

HYDROLYZED KERATIN :

Provides the scalp with the necessary ingredients to promote the restructuring of the hair, improving its appearance. Keratin protects the hair, preventing breakage.

SILICONES:

They have the ability to form a strong protective film, which helps to protect the hair against external damage. They bring antistatic properties to the hair, improving combability, while helping to increase the hair's shine and softness. They increase the shine effect of the conditioner without making the hair greasy.

Method of application:

Before use, shake the bottle well so that the two layers are temporarily mixed together to form an emulsion. Then spray the hair with the product. No need to rinse. Immediate conditioning effect.

*Professional Tip: To refresh the colour in the mid-lengths and ends it is recommended to wet the hair with TWO BIPHASE before applying the desired shade.
