

THE 12 in 1 ORIGINAL

93% NATURAL
ORIGIN INGREDIENTS

Definition

The original 12-in-1 instant treatment that revolutionised the market, now with an improved formula and an intelligent cream spray dosage system - the final product!

The Original is a cream product with an exclusive formulation based on Camellia Oil and Keratin that gives hair incredible results from the first application.

Benefits of use and visible results

- Helps to nourish and moisturize the hair.
- Contributes to the repair of split ends.
- With anti-frizz effect.
- Colour protection against UVA and UVB rays and thermal protection.
- Helps to improve combability, softness and silkiness of the hair.
- Contributes to increased shine.
- Helps to add volume to the hair.

Active ingredients and components

CAMELLIA OIL

A component from Jeju Island (Korea) that provides shine and conditioning to the hair.

PHENYLTRIMETHICONE

Gives hair shine and adds lustre. It acts by enveloping the hair with a protective layer against thermal damage, making the drying and ironing process easier.

CYCLOMETHICONE AND DIMETHICONOL

provides conditioning to the hair and facilitates combability by providing volume. It acts by forming a protective film round each hair, protecting it from the aggression of blow-drying and ironing, helping to repair the cuticle weakened by thermal wear and tear. It also acts against UVA and UVB by creating a protective film on the hair that prevents the hair's natural keratin from being damaged.

Method of application

After washing the hair, remove excess dampness with a towel. As it is a highly concentrated product, the application rate of The Original will depend on the length of the hair.

Apply The Original to the mid-lengths and ends and distribute evenly. This product is a leave-in, so it does not need to be rinsed out.

Presentation and format

- Bottle of 150ml → code 6710
 - Box of 12 units
