

LINECURE

HI - P R O F E S S I O N A L

MINERAL
OIL

Description:

SUBLIME YOUR HAIR WITH THE MAGIC OF HAIR OIL

Revitalise, nourish and protect your hair with the extraordinary properties of the new Mineral Oil.

Feel the regenerating power of Mineral Oil. A magic combination, where the richness of Argan and Camellia Oils is combined with the active ingredient of Plant Stem Cells.

The protective and restructuring effect of Argan and Camellia, which envelop and seal the cuticle protecting the outside of the hair fibre, provide the hair with vitamins and anti-oxidant properties, giving it an incomparable shine and elasticity together with the regenerative power of the Plant Stem Cells that strengthen the hair structure.

Benefits of use and visible results

- Helps to replenish the hair structure.
- Contributes to strengthening the hair fibre.
- Revitalises, nourishes and protects the hair.
- Provides the necessary moisturising to the hair.
- Provides shine and softness.
- Contributes to increasing the hair's elasticity.

Active ingredients and components

ARGAN OIL

Argan oil has been used for centuries for hair care thanks to the many properties it helps to provide the hair fibre with softness, moisturizing, protection and strength.

The oil is also rich in vitamin E, linoleic acid and natural tocopherols which give the oil anti-free radical and therefore anti-ageing properties.

CAMELIA OIL

Thanks to its fast and deep absorption, it penetrates the hair fibre and deeply hydrates the hair. Helps nourish and strengthen the hair, making it stronger and less brittle. Restores dry and lifeless hair making it nourished, moisturized and shiny. Renews damaged hair fibres.

PLANT STEM CELLS

They have very remarkable characteristics and are a key factor in hair regeneration. Their basic properties distinguish them from the rest because they can create a wide range of specialised cells from the same tissue, as well as possessing the extraordinary capacity for self-renewal and self-regeneration. This is why stem cells are particularly valuable and represent an essential research target in the field of hair regeneration.

Method of application:

The product can be applied in two different ways:

- **How to use on damp hair:** Apply 5ml (3 pumps) on the palm hands and spread from the mid-lengths to the ends. Massage with fingertips and detangle. Do not rinse. For all hair types.
- **How to use on dry hair** Apply 2ml (1 stroke) to the palm of hands and stroke gently from mid-lengths to ends. Do not apply more product than recommended. For all hair types.

When applying Mineral Oil it is very important to use the recommended amounts. In case of application on damp hair, we should apply a maximum of 5ml (3 pumps). In case of application on dry hair, do not apply more than 2ml (1 pulse). If more than the indicated amount is applied, the hair may become matted.
