## Thermal Heat Protector Spray

### Description:

Hipertin launches the best heat protector on the market with just the right hold to control unruly, wavy and frizzy hair. Hipertin's new HI Style Thermal Heat Protector is a specific product to achieve an extra straight finish. Its unique formula protects against thermal aggressions caused by both flat ironing and blow drying, providing nourishment and shine to the hair. This lotion can be applied on all hair types, achieving excellent results on both natural curly and permed hair.

Obtain flexible, natural and vigorous shapes.

### Active ingredients and components:

- **Wheat protein** that helps protect hair from thermal aggressions caused by straighteners and hair dryers.
- **Provitamin B5** remains in the hair after application and after rinsing, thus helping to retain moisture and reduce dryness and brittleness. It also provides docility from within the hair, preventing damage from excess heat received as a result of applying heat to the hair
- **Silicones.**

### Visible benefits and results:

- Leaves hair straighter for longer.
- Improves the combability of hair after blow-drying and straightening.
- Gives hair shine and brightness.
- Its ingredients based on Wheat Protein and Provitamin B5 provide protection, nourishment and shine, leaving hair smooth and silky.
- Lotion spray for easy application to the hair.

### Mode of use:

After washing the hair, remove excess moisture with a towel. Spray onto the hair and dry with a brush and blow-dryer.

For perfect straightness and to give the hairstyle a finishing touch, we recommend the use of a heat iron.

### Presentation and formats:

- Bottle of 200ml → code 8805
  - Box of 6 units
